

Ref: MB Docket No. 04-233

As a citizen, I object to removal of existing national services which use FM translators. I listen every day to K-LOVE at 106.7 along with all member of my family. 1) K-Love serves my local community needs by advertising local events, giving me access to local information (such as a concert by at a local facility) that other media outlets do not publize.

2) If replaced, there would be no available faimily frendly programming on the radio. This significantly impacts the community at the family level.

3) K-Love fosters traditional family values that are required for a stable society. There are very few vehicle left that do this. It is in the public interest to foster stable families of good morals.. (the money to run the FCC comes from people who are basically honest on there income taxes ... that is an example of moral values.)
